

**Bring Votership, remove poverty**  
**Bharat Gandhi**  
**Political reformist**  
**Federation for Economic Freedom**  
**(conducted by Global agreement on poverty and peace-GAPP)**

There is need to end slavery

There is story depicted in the Ramayan. It is said that Ravana had undressed Jatayu with sword and Jatayu fell from the sky. The mistake committed by Jatayu was such that he tried to save honour of Goddess Sita. The same story has been repeated with the 137 members of parliament who had demanded in parliament for giving some amount in cash to the voters every month on the pattern of pay and allowance and for implementing the package of the political reforms in parliament. They were issued even notice for making this demand these members of parliament the historic petition in the interest of the nation of the author Bharat Gandhi and others the members had advanced this argument in their support that the voters should also get salary and allowance because if they who make members eligible for getting salary and allowances. This amount has been named as votership on the pattern of scholarship. If the proposal moved in parliament is accepted the every voters will be issued ATM cash card in place of photo identity card and he will be entitled to get at least Rs 1750 and DA on this amount. Rejection of this proposal by parliament would have changed the face of country but the billionaires did not like this idea that the poor also may start bargaining for their labour and start demanding for hike in the wages after they are given the amount of votership. They also were not ready to digest that fact that good people may acquire power after reforms is made in politics because it could have checked those leaders who are in the habit of taking commission for everything. The parties and their president need a good amount to run their parties and they get this amount from the billionaires only. Therefore, they were influenced by threat given by the billionaires. The passage of law on this proposal could have the power of voters in place of leader of the country because the power in fact lies in the hands of those who are authorized to spend the amount of tax.

Several heads of the Parties, the Governments of at centre and the states and many of the officials are already in favour of continuing economic slavery for the development, but even the intellectuals who present fake solution to the development also consider that economic slavery is essential

for development. They will prefer making 80 percent people slave for the next 1000 years and sacrificing interest of such a huge population at the alter of factious development Evidently, the people presenting unreal solution by way of severely criticising the leaders and the bureaucrats are themselves a big problem for the society.

In such a situation there is nothing uncommon if the question is raised as to why the people should not rebel against dictatorship of the rich in the name of democracy when the maximum number of the people is to be treated as slaves and why the ongoing dictatorship of the rich should be legitimized by casting votes when every party after widening of its base is to be captured by the rich. Why the party presidents and their supporters who exploit democracy and favour feudalism should not be politically boycotted. Why the demand for reservation in Parliament, Legislative Assemblies and jobs for the poors and middle classes shouldn't be raised.

When the 80 percent people who are economically weak are never in a position to win elections, then why these 80 percent people shouldn't take initiatives action to create a separate system of governance, judiciary, currency etc for themselves. Why all the facilities like salary, pension allowance travel by rail, bus and air should be given to the leaders only, why these facilities shouldn't be extended to the voters as well.

Today the new generation is seeking freedom in this Internet Era as they are supposed to exhibit their talent all over the world. They are required to be liberated from the boundaries of the nations. But the irony is that the power is still in the hands of those conservative people who had read the books fifty years ago and who are unaware of the challenges existing of the present.

They have been suppressing the document related to Political reforms signed by 137 Members of Parliament since 2006, which has potential to change the whole world. They are not even ready to hold a debate on it, how they can implement the same. 6 May 2008 was scheduled for holding debate on it but parliament was prorogued one day before.

So the readers are requested to support our move of reforming politics of the countries and the world and establishing genuine democracy in place of fake democracy going on all over the world by publishing this book. They are requested to get associated with the organistion of their choice which is working towards global change.

Bharat Gandhi

15 Sep 2009

New Delhi.

## Real cause of existing poverty (slavery)

- 1) Just 1 percent amount of the income of the richest 500 persons of the world is adequate enough to eradicate poverty from the entire world, but the richest people are above the law and they consider it necessary to keep the reserves of the poors to works for them.
- 2) The reason for existing poverty has been the absence of solid arguments and dearth of publicity in favour of the poors.
- 3) There are many people who have been assigned the task of eradicating poverty consider it all necessary to maintain the big force of poors/slaves.
- 4) Most of the governments, intellectuals and leaders are engaged in removing their own poverty instead of removing economic slavery.
- 5) The people registering opposition to proposed votership in parliament are protectors of poverty and slavery.

## **What is economic independence**

- 1) Imposition of the condition to work for earning livelihood but for providing luxury there is no condition to work and this is evidence of economic slavery.
- 2) Not giving money by the government despite having fund in case of non compliance of condition to work is economic slavery.
- 3) Most of the farmer after purchasing tractors discontinues the use of bullocks and getting installed machines for every work being consider themselves above rich and to take the poors as surplus population. They join hands with the process of exploiting poors who find themselves trugged in bizarre situation in which they face price rise and money crunch simultaneously. The planning commission has been entrusted to look after this work (behind the curtain of development). 137 members of Parliament had moved a proposal of votership in Parliament in 2005 with a view to prevent all this but the billionaires threated Party Presidents of its ill consequences. The party Presidents showed the members of the outcome of violating Party whips and the members didn't show gults to proceed further on this issue. The proposed votership was left in midway Poverty, slaver and

suicides are going on as usual. They country will attain richness yet these problems will continue further for thousands of years to come.

- 4) Poverty is not caused on account of shortage but for laws.
- 5) Poverty is the outcome of laws favouring economics slavery.
- 6) Economic slavery is ulcer and poverty is pus leaked from clear. Poverty eradication means dressing of pus and continuing of ulcer.
- 7) Bullocks are not poor but slaves which are compelled to feed straws.
- 8) Bullocks will not get breads they will get only straws even if bullocks begin to work more for providing more grains out of love for its master.
- 9) Poor citizens of the country are also slaves like those of bullocks. Poors are bullocks tamed by billionaires for working against less wages, calling them retarded, idle, sinner of the past drunkard, gambler and workless is sheer ignorance or a conspiracy against them or both.
- 10) Extending help to poors may not end economic slavery, it will come to an end by fixing share to the voters as their birth right.
- 11) The above share is called votership amount. Economic independence is impossible without votership. Removing poverty is impossible without economic slavery. Votership is equal to sharing bread but the money earned through labour is equal to straw.

#### **Figures relating to votership in Parliament**

1) The number of MPs moving the proposal of votership In Parliament under Rule 168 during the year 2006-08	137
2) The Number of Loksabha MPs	112
3) The number of Rajyasabha MPs	25
4) The number of BJP MPs	54

5)	The number of SP MPs	19
6)	The number of BSP and Congress MPs	08
7)	The number of CPM, CPI, JD (U) MPs	00
8)	The number of RJD and JM MPs	04
9)	The number of RSP MPs	03
10)	The number of BJD, AGP MPs	02
11)	The number of SDF, MNF, NLF, JKNC, RLD, MDMK, DMK	01
12)	The number of MPs seeking debates on votership in Parliament under rule 193	33

### **Reasons for not enacting votership law in Parliament**

- 1) Power and shining of money produced leaders in the families of Forwarded castes. With money of votership the same thing will happen in the families of Dalits also with this all Dalits will not be compelled to assemble under the banner of same Dalit leader. Most of the Dalit leaders including Ramdas Athawale opposed votership in Parliament out of this fear only.
- 2) Eradication of poverty will not create feeling for the need for the communist rule among the poor. The communist parties opposed this move for the fear of this outcome.
- 3) The people leading a prosperous lives on the labour of workers opposed this move because they took it as true that proposed votership will enhance wages.
- 4) The party presidents prevented their members of Parliament from doing anything further in support of votership under the influence of threatening given by the billionaires for suppressing donation for contesting elections to those who support votership.

## **Utility of votership**

1. Full control over the crimes motivated due to economic constraint.
2. Eradication of poverty beyond any doubt.
3. Proven check on population growth.
4. Evolution to caste system based on their work.
5. Inevitable check on corruption- automatic reduction in corruption because of contraction of government sector, through check on systematic corruption and control on consumerism, management of political donation and check on economic corruption.
6. Origin of patriotism.
7. Economic justice to economically oppressed downtroddens and relieving women from oppression.
8. Effective check on crushing talents born in poor families.
9. Emergence of automatic relief system in case of natural calamity.
10. Treatment of mental blocking of the nation.
11. Emancipation from involuntary prostitution and rehabilitation.
12. Peace to resting souls of greatmen.
13. Compensatory liability of multinational companies.
14. Insurance of development of democracy and constitutional progress.
15. Effective control on the problem of unemployment through enhancement of purchasing power, provision of political finance, ATM network, increasing staff strength of Banks, supporting industries like bicycle industry, votership counselors, new recruitment in the vertical secretariat, internal inspiration of wisdom jobs.

16. Solution to the public problems of food, housing, drinking water education, treatment.
17. For knowing in detail please refer to the votership petition moved by 137 members of parliament published in form of a book.

### **Question – Answer on Votership**

1. In response to the argument of non availability of money you may say that you are seeking just half of share.
2. In response to the argument that no one would like to work after getting pension you may say that one will work to become richer than the neighbours and to get honour. The person getting a hefty amount as interest every month of the sum deposited in Banks on account of laws of succession also tends to work..
3. In reply to the logic that the government of the neighbour countries will become richer than our's if money is distributed in this manner you may advance this argument that the law for constituting the third level government for holding panchayat between the two governments is also being passed. The third level government is supposed to change money from the neighbouring governments also. The government of all the countries is liable to pay pension amount, our government has not to do this exclusively.
4. In response to the logic that the country is burdened with debt you may say that you are claiming the amount of your share and you are ready to repay the share of your debt through paying your three months pension. If confronted with this logic that money will not be left for development you may reply that you are leaving half of the amount of your share.
5. If someone says to you that the country is facing the problem of huge population, you may retort by saying that the rich families are not suffering with the problems of population increase only poor families are confronted with the problems of population increase. After votership amount is reached to every household, the girls will be

equally educated with this amount and the educated girls will bring a check on population suomoto.

6. If someone says that poverty will continue till population is increasing. You must say that boarding of money by rich persons is the main reason of poverty and the government on account of law of succession allows to pass on money free of cost to the sons from the father. There is no check on this. The son gets the money without making any effort and thus this power money starts pulling money from the pors like a magnet. With continuance of this law the rich persons will be pulling the money from the pors despite the population gets decreased and thus pors will remain as pors. As a matter of fact this is a slavery, not poverty. Poverty will exist as long as slavery goes on.
7. If this argument is advanced that people will consume liquor with the money of votership. You must confront by saying that everyone is not addicted to liquor. For the cause of drunkards, why the teetotalers should be punished. Now onwards the wives of the drunkards will no longer be dependent upon their drunkard husbands they will be able to mountain their families with the amount of votership.
8. In reply to the comment that where from such huge amount can be managed, you should that this much money can be managed by imposing tax on the properties of the billionaires, closing useless departments and paraphernalia of the government, levying tax on the rich fellows living abroad and unearthing black money deposit within and outside the country.
9. In reply to the comment that India will become a weak nation on the line of Russia if voter pension is introduced, you are required to say that for this reason only demand has not been made for full economic equality, only minimum economic equality is being sought in, which may create this much equality if government agrees to pay Rs 1750 as voter pension but with this amount only any one cannot acquire wealth.
10. In response to the logic that pors suffer on account of their deeds you must say that suffering on account of one's deeds is alright but happening so as a result of law is not justified. All are the children of

his Almighty and he will be happy if votership amount is paid to all of this children as a father feels over prosperity of his son.

11. In reply to the argument that the provision of voter pension made by the government will cause price rise you should say that for this reason only Dearness Allowance is also being sought alongwith voter pension and this allowance is already payable to the government employee. This allowance should be given to all as price rise affects everybody. Production cannot get diminished if there is money, machine and workforce in the country and in such a situation price cannot go up.
12. For other similar question answer please refer the petition on votership moved by 137 MPs in Parliament, which has been published in book form.

## **Votership Mantra**

1. Improve politics, emancipate world
2. Poverty is pus, slavery is ulcer, treat ulcer instead of cleaning pus.
3. Machine is for all and all is meant for labor, bridge the gap between rich and poor
4. Hit hate, break visa to bring world together
5. Division of Dalit reservation, friendship between rich and poor.
6. We wish, Pay money to all
7. Favour votership, rule the country
8. Implement voter pension or leave power connection
9. Votership will complete the mission of equality professed by many saints
10. Protect poors among Dalits by introduction of inclusive reservation.
11. Vote, not note (currency)
12. Voter pension solve every tension
13. World is for change, power to gentle and money to voter
14. Break the journey of economic slavery
15. We wish money to all, power to good and peace in globalhood.
16. No rest till share to all in.

To know the reasons for not enacting law in detail please refer the book 'Great war against economic turbulence' (Price Rs 40- the book is available in Hindi, English, Punjabi, Marathi and Urdu)

### **What is Votership?**

- 1) A new terminology on the line of scholarship.
- 2) Voter's share against the share of machines in GDP
- 3) Government's share in the Private property and private income and the debentures to individuals who participate in the process of formation of government i.e. voters in that share.
- 4) The fees given to voters for their contribution in formation of government and enactment of law.
- 5) The fees to be paid to voters as is paid to three pillars of democracy.
- 6) Voters share in rent against common property.
- 7) Measures for common mens participation in development.
- 8) Measures for economic democracy and economic freedom.
- 9) Measures for attaining freedom of undertaking work of one's choice.
- 10) Measures to lead life with dignity
- 11) Measures to convert fake democracy into genuine one.
- 12) Measures to contract population
- 13) Measures to enhance voting percentage in elections
- 14) To know about this in detail please refer the petition on votership presented in parliament by 137 members of Parliament, which has been published in book form.

## Why Votership

- 1) Machinisation is a compulsion in world economy base on Dunkle (GATT) agreement. Computers snatched work from the hands of educated one, so did bulldozers/tractors by snatching work from the hands of illiterates. Hence, Providing employment to every hand is impossible.
- 2) Till now forced work has been taken as employment under compulsion but now it is not so.
- 3) Imposing condition to work for money essential for life is a evil of economic slavery. One who is willing to attain richness should be asked to work not one who just want to fulfil basic necessities of life.
- 4) The participants in law making process (Voters) did not charge any money earlier but now they want it. The rich who acquired richness by extracting benefits from law should pay this fees (tax for votership fund) law making is a work in itself and votership is fee for this work.
- 5) Economic slavery is no longer a source of production.
- 6) Illness of public is not so bad as is their unemployment.
- 7) Votership is solution to many of the present problems.
- 8) There is no better way than paying for votership for inclusive growth.
- 9) There is no alternative to votership
- 10) To know in detail about this please go through the petition on votership as presented by 137 MPs in parliament which is published in book form (Price Rs 60)

## **Votership : Source of Money ?**

### **Indigenous sources of India**

- 1) Direct funding for public welfare budget (Around 4 lakh 26 crore)
- 2) Property tax on the people above richness line (Rs 50 crore)
- 3) Tax for governance

### **Common global source**

- 1) The amount received by India from developed countries under the liability for Millenium Development goal (MDG) tax on Multinational companies (MNCs) the tax realized by UNO on income and tax of global traders.
- 2) India's share in the fund established with the tax amount as 7 percent of GDP of all countries collected as share of natural resources from all countries in U.N.O.
- 3) To know about this in detail please refer the petition on votership presented in Parliament by members of parliament which has been published in book form.

### **Is Votership possible?**

- 1) At least the amount being spent in different heads such as Ration, Panjiri, Mid day meal, pension of various kinds subsidies etc can be possibly send directly in voters accounts. The amount of votership can be paid for many months together with the money government spends on sports games and luxury sports and luxuries are not equally precious as are two times meals
- 2) If paying votership to all in one go is not possible it may be paid in installments serially to poor women, to all poors to all women and lastly to all voters.
- 3) Prior to installation of ATM machines it was almost impossible to introduce votership but now it is possible.

- 4) The political parties having intention of befooling the public will no longer be able to garner votes and they will have to support votership in Parliament sooner or later for running the parties.
- 5) The argument for non availability of funds for votership can be advanced only after raising tax on the rich. Till now tax has been not imposed for this purpose.
- 6) Till 1947 money raised in the country got to be spent in London, from 1950 onwards that money was to be spent in Delhi and the capitals of the States. In 1967 Prime Minister shastriji favoured sending the money in the districts and in 1972 Indiraji sent that money towards the blocks. Again in 1985 under Rajiv Gandhi regime that money was sent to villages through panchayati Raj. Now the turn is for the families to receive that money. This is going to happen exactly through votership.
- 7) When this campaign is going on successfully under the name of basic income in 24 countries such as Brazil Namibia Neetherland etc why the same system cannot succeed in India.
- 8) Prior to Shri Sridharan other Engineers could not take up the challenge of taking up Metro Project but he executed the same will al success. Like wise if any one takes the argument that votership cannot be possibly introduced he is simply showing his inability. But this is definitely possible for those who are associated with this move of votership. Every work is not meant for everyone. If political Parties together feel that votership cannot be implemented, they should give chance to these compaigners of votership form a government of their own for implementing votership agenda.
- 9) Had Duryodhana been able to stable his rule for the generations to come, the lineages of Yudhisthir could get only this reply from them you may just seek employment don't seek the rent against your ancestors property (Votership) there is no money for votership. It is not possible to provide votership see the wretched conditions we members of royal family are living in our family owns a fleet of 10 cars only. We are compelled live like this. How can we give tax in such constraints. It is obvious that those who consider votershiip as an

impossible proposition are feeding wrong thing in the minds of people like thos sucessors of Duryodhana.

- 10) Prior to Mulayam singh government (2004) it could not be possible to give unemployment allowance. The central government is giving Rs 400 in cas now but earlier this was not made possible. Efforts in right direction make any thing possible. In absence of efforts everything seems quite impossible.
- 11) To know about this in detail please read the petition on votership signed by 137 members of Parliament presented in parliament which has been published in book form.

## Great Men's words and votership

1. I am going to start struggle for economic freedom after achieving political freedom.....  
**Mahatama Gandhi**
2. Right to vote gives chance of participation to voters in the political decision and votership right make them participant in economic decision taken by the state.....**Bharat Gandhi**
3. We are leading towards the world Government...**Jawahar Lal Nehru**
4. In this era of free trade and internet the governments of the countries have become rudderless in absence of the world govt.**Bharat Gandhi**
5. Socialism will be accepted but after my death.  
**Dr Ram Manohar Lohia**
6. On 26<sup>th</sup> January 1950 we will be entering into dual life of inner contradiction. We will find equality in Politics but inequality in social and economic life. We will be accepting the formulae of one man one vote in Politics but not accepting this ideal in our social and economic life.  
**Dr B.R. Ambedkar**  
**(To Chairman of the constituent Assembly)**
7. Right to vote created political equality and votership right will create minimum economic equality.  
**Bharat Gandhi**
8. Political democracy is meaningless with economic democracy.  
**Pt Deen Dayal Upadhyaya**
9. Votership is a measure to achieve economic democracy in the way vote is a means of political democracy.
10. Money and lands are to be divided the hungry people will not kept silence.  
**Achary Vinoba Bhave**
11. The King should be of stoic character like lord Rama.

12. Votership will make it possible to search the person of stoic character and handover the power to him. **Bharat Gandhi**
13. The next generation will put this question to the present generation whether there was no thinker who could have propounded the thought that the condition forcing to work for bread is an immoral act. **Osho (Year1982)**
14. Voter Pension (Votership) gives unconditional right to live. **Bharat Ganhi (1996)**
15. Fulfilment of minimum basis needs is responsibility of the state.
16. The path between capitalism and communalism is appropriate for India. **Jawaharlal Nehru**
17. Votership is a path between the two. **Bharat Gandhi**
18. Average living is equivalent to non violent living. **Acharya SriRam Sharma**
19. Votership provides opportunity to lead an average life to both above and below specific income line. **Bharat Gandhi**
20. Establishment of justice is possible only under the rule of proletariat.
21. Political power is just like a shadow of economic power the real power of governance lies not in chair, but in money. Establishment of justice does not require power to all proletariats but money which is possible through votership. **Bharat Gandhi**
22. Genuine solution to poverty today lies with Bharat Gandhi. The Central Government should pay head. **Dr Bharat Jhunjunwala (Economist)**
23. Votership carries forward the intention of the constitution makers. It will enhance voting percentage which is the biggest need to today. **Subhash Kashyap (Constitution Expert)**
